

gram, and the *Bifidobacterium infantis* concentration is at least 1×10^{10} CFU per gram, each concentration based on the total composition, and

- a container B holding a liquid, creamy or pasty foodstuff,

both said containers A and B being closed and openable at the moment of consuming said foodstuff, and said container A being arranged for the purpose of supplementing the composition held therein to the foodstuff held in container B, at the moment of consuming said foodstuff.

2 15. The kit of claim 14, wherein the *Streptococcus thermophilus* concentration is 1×10^{11} to 1×10^{14} CFU per gram, the *Bifidobacterium longum* concentration is 1×10^{11} to 1×10^{14} CFU per gram, and the *Bifidobacterium infantis* concentration is 1×10^{10} to 1×10^{13} CFU per gram, each concentration based on the total composition.

3 16. The kit of claim 14, wherein the composition is in a liquid form.

4 17. The kit of claim 14, wherein the composition is in a dry powder form.

5 18. The kit of claim 14, wherein the composition is an enteral dietary composition.

6 19. The kit of claim 14, wherein the composition is an enteral dietary composition.

7 20. The kit of claim 14, wherein the composition is an enteral dietary composition.

8 21. The kit of claim 14, wherein the composition is an enteral dietary composition.

SUPPORT FOR AMENDMENTS

New Claim 14 is supported by original Claim 13. The concentration ranges described in Claim 15 are supported throughout the specification and the Examples, original Claim 4, the paragraph bridging pages 8 and 9, etc. Claims 16 and 17 are supported at at least page 10, lines 19-24. Claims 18-21 are supported at at least page 6, lines 25-26. Accordingly, no new
